D&K Group, Inc. Introduces Aircraft Battery Lock

Elk Grove Village, IL – (January 1, 2006) – D&K Group, Inc. introduces the patented Aircraft Battery Lock designed for personal aviation. The Battery Lock, Patent No. US 6,946,217, is a device that renders aircraft batteries useless when properly installed. The battery lock satisfies the Transportation and Safety Administration's A-011 security guidelines for G. A. airports and New Jersey's requirements for a second aircraft lock.

The Battery Lock is constructed using a tough, space-age plastic polymer and a seven pin circular hardened ball bearing lock. The Battery Lock can be installed and removed with one hand, even in the most difficult locations. The Battery Lock will work on all jets and helicopters using common battery types, as pictured above. The product is available for \$245, plus shipping and handling.

For more information on D&K's Aircraft Battery Lock, visit the website at www.batterylock.com, or contact Brian Biegel at 847-956-0160.

D&K Custom Machine Design, a division of D&K Group, Inc., specializes in manufacturing custom machine parts and supplies. For more information about D&K Group, visit the website at <http://www.dkgroup.com/>.
